ADMMicro Relocates into New Corporate Headquarters

The company that changes the way you do business, has changed where they do business

Roanoke, Va. (January 15, 2009)— ADMMicro, Inc. has completed the move into its new corporate headquarters in the former Johnson & Johnson Innotech building located near the Roanoke Regional Airport.

The new location provides administrative and conference space for ADMMicro's professional engineering and sales operations. It includes office space, a reception area, cafeteria and a highly specialized training facility for customers and distributors.

“This new location will allow us to continue the growth of our Engineering and Support capabilities and most importantly, improve our ability to serve our customers,” says Don Howell, ADMMicro's president and CEO. Howell says ADMMicro, which began manufacturing its patented energy management and submetering systems in 2004, has grown from a few employees to nearly 50, with continuing growth likely.

Howell says the state-of-the-art facility is a good match for technology companies such as ADMMicro, which occupies 30,000 square feet of the 146,000 square-foot building.

ADMMicro helps clients monitor and manage energy costs with its patented systems. By combining submetering and energy management capabilities, ADMMicro is able to track utility consumption and enable customers to reduce their energy costs and carbon footprints.

ADMMicro's products are used at thousands of sites across the country, and clients include Target, U.S. Postal Service, DSW, and O'Reilly Auto Parts. The company will continue its manufacturing operations at six outside facilities, including three in the Roanoke area.

About ADMMicro

Headquartered in Roanoke, Va., ADMMicro offers a new breed of intelligent energy management systems equipped with revenue-grade accurate metering devices to monitor electricity, natural gas, propane, or water consumption. The patented system can enhance security systems and manage retail maintenance service calls. The Energy Management System delivers rapid ROI for buildings of 1,500 square feet and up. ADMMicro is an Energy Star partner.
