**ADMMicro to Relocate Offices to Former Johnson & Johnson
Innotech Building**

Two Roanoke-Based Companies Work to Drive Region's Economic Engine

Roanoke, Va. (Nov. 12, 2008)— ADMMicro, Inc. announced today it will move into new corporate headquarters in the former Johnson & Johnson Innotech building located near the Roanoke Regional Airport in early December.

The energy management company will take occupancy of 30,000 square feet of the 146,000-square-foot building owned by Delta Dental of Virginia beginning December 1. ADMMicro currently leases first floor office space at 111 Franklin Road, Roanoke.

The new location will provide administrative and conference space for ADMMicro's professional engineering and sales operations. It will include office space, a reception area, cafeteria and a highly specialized training facility for customers and distributors.

"This move will provide much needed space for our growing company," says Don Howell, ADMMicro's president and CEO. Howell says ADMMicro, which began manufacturing its patented energy management and submetering systems in 2004, has grown from a few employees to nearly 50, with continuing growth likely.

Delta Dental of Virginia purchased the Johnson & Johnson Innotech building in March 2007. The company originally purchased an option on the factory as a potential location to consolidate its Roanoke headquarters and operations facilities. Retrofitting the manufacturing facility to office space proved not to be feasible. Delta Dental went through with the purchase as an investment and an economic development opportunity for the Roanoke Valley.

"As a technology company, ADMMicro is a great match for the Johnson & Johnson Innotech building," said Mike Wise, Vice President of Finance, Delta Dental of Virginia. "It is exciting to see a local company succeed and to be able to provide a state-of-the-art facility that accommodates their growth to keep those good jobs in the community."

Wise noted that Waldvogel Commercial Properties is actively marketing the world-class manufacturing facility nationally and internationally for tenants for the remaining space.

ADMMicro helps clients monitor and manage energy costs with its patented systems. By combining submetering and energy management capabilities, ADMMicro is able to track utility consumption and enable customers to reduce their energy costs and carbon footprints.

ADMMicro's products are used at thousands of sites across the country, and clients include Target, U.S. Postal Service, DSW, and O'Reilly Auto Parts. The company will continue its manufacturing operations at six outside facilities, including three in the Roanoke area.
