***ADMMicro Announces Approval of Patent
New panel will cover multiple sub-loads.***

For Immediate Release

Roanoke, VA. (Feb. 9, 2009) ADMMicro, Inc. announced today that the U.S. Patent and Trademark Office has approved the issuance of a patent 7460930, filed on May 13, 2005, for an energy management system and method to monitor and control multiple sub-loads.

The patent covers ADMMicro's combination panel, which features both the energy control module and the submetering monitoring module on the same board. The panel is unique in the industry both in the detail of its monitoring and control capabilities as well as its space-saving footprint.

The company has installed its energy management systems and sub-metering systems in thousands of retail and warehouse establishments nationwide.

###

About ADMMicro

Headquartered in Roanoke, Va., ADMMicro offers a new breed of intelligent energy management systems equipped with revenue-grade accurate metering devices to monitor electricity, natural gas, propane, or water consumption. The patented system can enhance security systems and manage retail maintenance service calls. The Energy Management System delivers rapid ROI for buildings of 1,500 square feet and up. ADMMicro is an Energy Star partner.
